

Siddharth Chittapuram

📍 San Francisco Bay Area, CA (Open to Relocation)

📞 925-353-5095 | ✉ gosiddharth1@gmail.com | 🐙 github.com/schittap | 🔗 [linkedin.com/in/siddharth-chittapuram](https://www.linkedin.com/in/siddharth-chittapuram)

EDUCATION

University of California, Los Angeles (UCLA)

Expected June 2027

B.S. in Mathematics/Economics & B.S. in Statistics and Data Science, Minor in Global Studies **GPA: 3.62/4.00**

Coursework: Statistical Models & Data Mining, Optimization, Experiment Design, Data Analysis & Regression, Computational Statistics, Mathematical Finance, International Finance, Econometrics, Probability, Stochastic Processes, Real Analysis, Discrete Structures, Proof-Based Linear Algebra, Theories of Development

Organizations: National Student Data Corps, Bruin Reserve Bank, Statistics Club, DataRes Learn, Quiz Bowl

SKILLS

Programming Languages: R (Machine Learning: mlr3, Tidyverse: ggplot2, dplyr, stringr, tidyr), Python (NumPy, Pandas, Matplotlib, Seaborn), SQL, C++, Java, LaTeX

Office Tools/Software: Microsoft Excel, PowerPoint, Tableau, QGIS, ArcGIS Online, Google Sheets

World Languages: French (Intermediate)

Interests: Cycling, Motorcycling, Dirt Biking, Kayaking, Paddleboarding, Hiking, Solo-traveling the US, Mario Games

PROJECTS & RESEARCH

2026 ASA DataFest at UCLA - Chronic Kidney Disease (CKD) Analysis | R

May 2026

- Collaborated in a team of 4 to analyze clinical data of patients from Stormont Vail Health against the CDC's Social Vulnerability Index (SVI) for the West Coast's largest data hackathon (370 students).
- Designed an R-based choropleth map of Kansas counties to visualize SVI, integrating with Python visualizations showing high-vulnerability patients receive 56% fewer routine visits at Stage 2 and experience a threefold increase in ER encounters at end-stage kidney failure.
- Co-developed recommendations of expanding telehealth and Southwest Kansas mobile screening units.
- Award:** Honorable Mention for Best Use of External Data (Top 8/78 teams), cited by judges as "digging deep into the Social Vulnerability Index with a strong accompanying visual."

Mathematical Finance Calculator | Python

July 2025 – November 2025

- Independently determined profitability of financial derivatives (forwards, European/American options) with user-inputted data, including checking for put-call parity satisfaction.
- Integrated Yahoo Finance API, NumPy, and Pandas to visualize time series plots and Kernel Density Estimation (KDE) histograms for a user-inputted stock ticker and time range.
- Computed mean, standard deviation, and annualized volatility for stock price differences to infer investment risk.

Bruin Reserve Bank Think Tank Data Analyses | R, Tableau

September 2024 – September 2025

- Directed team of 5 in producing an 18-page economics research paper, utilizing a multiple case-study methodology and 15+ scholarly sources to analyze limitations of GDP per capita.
- Cleaned World Bank datasets to graph 60 years of country-specific GDP per capita, visualizing research findings.
- Utilized ggplot2 for monthly changes in China's Consumer Price Index and short-term Japanese interbank rates.

EXPERIENCE

State University of New York (SUNY) New Paltz

August 2026 – Present

Research Assistant — Dr. Lucy Cui, Department of Psychology

New Paltz, NY (Remote)

- Extracted and standardized graph coordinates with R regex to aggregate 95+ PsychoPy user outputs into automated Matplotlib heat maps
- Modified CSV column names and categorized/quantified user-specific responses to compute summary statistics

Self-Employed

April 2025 – Present

Private Tutor

Remote

- Developed 60+ hours of lesson planning and consultation with both students and parents for Advanced Placement and high-school level mathematics courses.
- Designed nuanced learning strategies for standardized exam preparation and positively standing out in applications.
